EXPERIENCE

Georgia Tech, Atlanta, GA — *Graduate Research Assistant*

August 2017 - Present

Working on the Communities Who Know (CWK) Project as lead designer and full-stack developer. Involves design, development and maintenance of various data visualizations in the CWK dashboard for representing community data.

Clairvoyant India Pvt Ltd, Pune, India — *Software Engineer*

August 2016 - June 2017

Worked as a Full-Stack developer on an Enterprise project delivered to a major health insurance company based in the US. Java based project using Spring Boot, Kafka, Spock, MongoDb and Angular2.

San Telequip Pvt Ltd, Pune, India — Project *Intern*

August 2015 - June 2016

Developed a Migratory Bird Tracking System using RF and Android mobile base stations, which was also my capstone engineering project.

SELECTED PROJECTS

Bravos — *UX Researcher/Designer,* Class Project

Study undergarment purchasing experience for non-traditional buyers at a specialty store and create a design solution to improve the customer shopping experience.

CinemALL — *UX Researcher/Designer,* Class Project

Study in-theater movie experience for visually impaired guests and thereby create a design solution to improve the overall movie-going experience for that user-group.

Automobile Driver Profiling — *Researcher,* Individual Project

Designed an in-car system using Driver profiling, Affective Computing and Multimodal feedbacks which infers emotions from actions to enable safe driving. Published a research paper which was presented at an IEEE conference (IC3I 2016).
